

CALL FOR PAPERS

ICBCEM 2020
Feb 17-18, 2020
Male, Maldives

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBCEM 2020 : International Conference on Building and Civil Engineering Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Building and Civil Engineering Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Civil engineering materials
Advances in civil engineering materials
Strength of materials
Failure of real construction materials
Thermal properties of materials
Pressure and pressure dynamics
Electrical properties of materials
Chemistry of construction materials
Properties of fluids in solids
Transport of fluids in solids
Transport of ions in fluids
Ionising radiation
Variability and statistics

Use of test results
Specifications and standards
Testing construction materials
Cement and concrete
Cements and cement replacement materials
Aggregates for concrete and mortar
Hydration of cement
Concrete mix design
Testing wet and hardened concrete
Creep, shrinkage, and cracking of concrete
Admixtures for concrete
Durability of concrete structures
Production of durable concrete
