

CALL FOR PAPERS

ICMMIS 2020
Feb 17-18, 2020
Male, Maldives

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMMIS 2020 : International Conference on Management of Marine Invasive Species is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Management of Marine Invasive Species. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Invasive species management
- Invasive species and plants
- Taxonomy and invasive species
- Prevention, survey and detection
- Controlling invasive species and restoring habitat
- Advantages and disadvantages of invasive species management
- Invasive species management for wildlife and forestry

- Resource protection and long-term management
- Purpose of controlling invasive species
- Planning to control invasive species
- Control methods
- Pressures on management and restoration
- Education, training, and public outreach
