

CALL FOR PAPERS

ICSASC 2020
Feb 17-18, 2020
Male, Maldives

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSASC 2020 : International Conference on Systemology, Autopoietic Systems and Complexity is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Systemology, Autopoietic Systems and Complexity. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Autopoiesis
Autopoietic systems
Autopoiesis perspectives
Systemology and self-organization
Autopoiesis, complexity, and emergence
Autopoiesis, adaptive capacity, and coevolution
Feedback and feed-forward loops
Feeding processes of self-organization
Autopoiesis, autopoietic systems and cybernetics
Autopoiesis and social systems

Autopoiesis and biological systems
Autopoiesis and artificial systems
Autopoiesis and cyber cognition
Computer model of autopoiesis
Self-adaptive and self-organizing information systems
Self-adaptive and self-organizing communication systems
Self-adaptive and self-organizing social systems
Production process, organization and structure
Closed organization and autonomous unity
