

CALL FOR PAPERS

ICTM 2020
Feb 17-18, 2020
Male, Maldives

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTM 2020 : International Conference on Thematic Mapping is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Thematic Mapping. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Thematic mapping

Uses of thematic mapping

Mapping methods

Thematic mapping of subtidal coastal habitats

Qualitative and quantitative thematic data and maps

Change detection for thematic mapping

Applications of statistics to thematic mapping

Thematic mapping from satellite imagery

Geostationary and near-polar meteorological satellites

Land observation satellite systems

Production processes for extracting information from satellite data

Visual image interpretation

Computer-assisted image analysis

Methods for combining satellite-derived information

Geometric corrections

Mosaicking

Radiometric processing

Data presentation for map-background purposes

Role of geographic information systems (gis)

Design and semiology of cartographic representation

Selection of information for satellite cartography

Types of space maps products

Image map design

Image map typology

Applications

General satellite cartography
