

# CALL FOR PAPERS

**ICTWBTM 2020**  
**Feb 17-18, 2020**  
**Male, Maldives**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTWBTM 2020 : International Conference on Textile Wastewater and Biological Treatment Method is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Textile Wastewater and Biological Treatment Method. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Textile wastewater	Biological wastewater treatment method
Textile printing and dyeing process	Biochemical and physicochemical combination processes
Fabric printing and dyeing wastewater	Cutting-edge treatment process
Yarn printing and dyeing wastewater	Electrochemical oxidation
Production of textile industry pollution	Ultrasonic technology
Textile dyeing wastewater risk	Current technologies for decolourisation of textile wastewaters
The textile industry standards for water pollutants	Microbial decolourisation and degradation of textile dyes
Textile wastewater treatment	Microbial decolorization of textile-dyecontaining effluents
Textile dyeing wastewater treatment processes	Biodecolourisation of textile dyes
Physicochemical wastewater treatment	Environmental problems and a public health concerns
