

CALL FOR PAPERS

ICGGMA 2020
Feb 03-04, 2020
Melbourne, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGGMA 2020 : International Conference on Geohazards, Geotechnical Mapping and Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geohazards, Geotechnical Mapping and Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geohazards
Geohazards risk assessments
Methodology
Geohazards and risk
Geohazards and disaster mitigation
Geotechnical mapping of
discontinuities
Geomechanical testing
Slope stability analysis
Risk evaluation
Risk management and mitigation

Landslides
Debris flows
Shallow gas accumulation
Overpressured zones (including gas
and shallow water flows)
Naturally occurring gas hydrates
and their climate-controlled
meta-stability
Mud flows, diapirism and
volcanism/volcanoes
Flood basalt
Earthquakes and seismicity
Tsunamis from tectonics and
landslides
Rock falls and landslides
