

CALL FOR PAPERS

ICGMMM 2020
Feb 03-04, 2020
Melbourne, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGMMM 2020 : International Conference on Geologic Mapping Methods and Measurements is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geologic Mapping Methods and Measurements. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geologic mapping field methods
Geologic mapping methods and techniques
Field equipment
Types of geological map
Topographic base maps
Field measurements and techniques
Field maps and field notebooks
Cross-sections and three-dimensional illustrations
Geological reports
Geographic coordinates and metric grids

Position finding on maps
Magnetic declination
Planetable mapping
Aerial photographs
Satellite imagery
Topographic maps
Pace and compass mapping
Mapping groundwater characteristics
Rocks, fossils and ores
