

# CALL FOR PAPERS

**ICPPP 2020**  
**Feb 03-04, 2020**  
**Melbourne, Australia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPPP 2020 : International Conference on Petrography and Petrological Problems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Petrography and Petrological Problems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Petrography  
Petrological processes  
Interrelationships in  
petrographical and petrological  
problems  
Optical mineralogy and petrography  
Petrography of sedimentary rocks  
Geologic and stratigraphic setting  
Methods of investigation  
Macroscopic characters  
Microscopic characteristics  
Separation of components  
Chemical analysis  
Specific gravity  
Archaeological applications

General classification of igneous,  
sedimentary and metamorphic rocks  
Description and identification of  
igneous, sedimentary and  
metamorphic rocks  
Mesoscopic and microscopic scale  
Theory, experiment and modeling  
Field methods  
Abundance of different rock types  
Igneous petrology  
Metamorphic petrology  
Chemical petrology  
Experimental petrology  
Sedimentary petrology  
Petrography  
Phase diagrams
