

CALL FOR PAPERS

ICEAMS 2020
Feb 06-07, 2020
Phuket, Thailand

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEAMS 2020 : International Conference on Engineering Applications of Multimaterial Structures is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Engineering Applications of Multimaterial Structures. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Optimized material selection for hybrid structures
Joining of composites to other materials
High-performance adhesives
Design for light weighting
Design for cost optimization
Multi-functional design

Industrial assembly of multi-material structures
Condition monitoring of multi-material structures
Repair of multi-material structures
Disassembly and end-of-life management of multi-material structures
Case studies of multi-material applications
