

CALL FOR PAPERS

ICAET 2020
Feb 27-28, 2020
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAET 2020 : International Conference on Aerospace Electronics and Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Aerospace Electronics and Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Attitude maneuver control	Geophysical Image Processing
Autonomous flight control	Geoscience and remote sensing
Ballistic tracking	GPS multipath
Bistatic SAR processing	Ground Support System
Communications techniques	Image analysis
Control design	Image Recognition
Convex parameterization	Interactivity via satellite
Detection in non-gaussian distribution environment	Interference cancellation
Doppler signature classifications	Interference Suppression
Earth terminal systems	Intersatellite links
Estimation and detection theory	Intrapulse radar
Estimation for guidance, navigation and control of an aerial vehicle	Ionospheric Techniques
Finite elements	Meteorological Radar
