

# CALL FOR PAPERS

**ICCPSDS 2020**  
**Feb 27-28, 2020**  
**Sydney, Australia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCPSDS 2020 : International Conference on Construction Processes and Safe Design of Structures is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Construction Processes and Safe Design of Structures. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

History of architecture and the built environment  
Individual buildings and building types  
Town planning  
Architectural theory  
Developments in construction  
Construction management  
Construction safety and Health  
Architectural design and it's theory  
Bridge engineering and building structure  
Materials and construction systems  
Building technology  
Construction and control; detection and transformation  
Structural engineering and disaster reduction

Social research examines the people who inhabit and use the spaces of architecture

Technological research studies the physical materials, methods, elements, systems, and science of architecture and the design and construction processes

Environmental research investigates the physical context of architecture, opening timely questions about the influence of society on environment

Cultural research studies place-making and the norms of the inhabitants of natural and built places past, present, and future

Organizational research examines the ways in which individuals and teams collaborate in the practice of architecture and in the client organizations

Design research considers the processes of shaping and making of places

Educational Research examines the pedagogies of architecture and related fields

Energy and sustainability

Refurbishment and maintenance

Civil and structural Engineering

Building technologies; cartography and geographic information system

Allied arts such as painting and sculpture

Aesthetics and landscape
