

CALL FOR PAPERS

ICT 2020
Feb 27-28, 2020
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICT 2020 : International Conference on Tribology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Tribology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Condensed matter physics
Dynamics of tribology towards high
quality optimization
Enhancing the efficiency and
durability of machines by
controlling friction and wear
Fundamentals of tribology
Green technology
Inorganic and organic chemistry,
and biology
Life and tribology
Lubrication and lubricants
Manufacturing and machine elements
Micro- and nano-tribology

Molecular physics
New materials, modern lubricants
and additives
Science of friction
Surface and material engineering
Surface physics
Surface Technology and Tribology
Tribology and lubrication
Tribo-system
Visualization of buried interface
