

# CALL FOR PAPERS

**ICFEM 2020**  
**Feb 27-28, 2020**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFEM 2020 : International Conference on Forensic Engineering and Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Forensic Engineering and Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Politics of standards, change and innovation  
Development of proactive quality management in organisations, innovation and societies  
Design of experiments and learning  
Knowledge and project management in innovation  
Tools and processes to detect management and engineering failures  
Inter-project and organisational learning  
Reflection and risk in innovation  
System engineering and management

Development and refinement of failure management tools and techniques  
Managing failure databases and analysis  
Safety and risk management  
Failure tolerance and training  
Insurance, liability and legal issues  
Emergency response systems  
Failure-based innovation and learning
