

CALL FOR PAPERS

ICEM 2020
Mar 05-06, 2020
Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEM 2020 : International Conference on Electrodeposited Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electrodeposited Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Phase and structure formation in metals being electrodeposited
Influence of nanocrystal, amorphous, and oriented structure on the properties of electrodeposited materials
Interdependencies between substructure, lattice defects, structural inhomogeneity, surface morphology and phase composition of electrodeposited materials and their properties

Tendencies and directions in obtaining of electrodeposited coatings with enhanced properties
New methods and techniques for structure investigations of electrodeposited metals
