

CALL FOR PAPERS

ICICCA 2020
Mar 05-06, 2020
Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICICCA 2020 : International Conference on Intelligent Computing and Caching Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Intelligent Computing and Caching Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

System modelling: Computation modelling, caching modelling, energy consumption modelling etc
Enabling technologies: e.g., SDN, NFV, CRAN, D2D, cloud/fog computing and networking
Application areas: vehicular networking, IoT, smart grid
Novel network architecture: convergence of computing, communications and caching, content/information-centric network, cognitive computing and networking, big data analytic

Context-aware schemes: incentive mechanism for computing and caching, pricing, game theoretic approach, network economic etc, caching placement and delivery
Mobility management for mobile edge computing and proactive caching;
Energy efficiency aspects: energy harvesting, energy storage, energy transfer, etc
Security and privacy issue
Prototyping, test-beds and field trials
