

CALL FOR PAPERS

ICACITM 2020
Mar 19-20, 2020
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACITM 2020 : International Conference on Analog Communication, Information Technology and Methods is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Analog Communication, Information Technology and Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Analog communication systems
Analog modulation
Information technology
Basic analog communications system
Components of a communications system
Types of analog modulation
Analog modulation methods
Analog modulation techniques
Amplitude modulation
Frequency modulation
Phase modulation

Analog transmission of digital data
Advantages and disadvantages
Digital modulation
Digital modulation methods
Fundamental digital modulation methods
Modulator and detector principles of operation
Common digital modulation techniques
Automatic digital modulation recognition (admr)
Digital baseband modulation or line coding
Analog and digital modulation techniques
