

# CALL FOR PAPERS

**ICACPA 2020**  
**Mar 19-20, 2020**  
**Dubai, UAE**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACPA 2020 : International Conference on Advances in Computational Pathology and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Computational Pathology and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Artificial intelligence and deep learning for computational pathology  
Stain normalization/standardization  
Detection, classification and segmentation of tissue structures (cells, glands etc.)  
Detection and discovery of predictive and prognostic tissue biomarkers  
Whole-slide image analysis  
Registration of whole-slide images

Immunohistochemistry scoring  
Multiplexed staining  
Unlabeled multiplexing  
Crowdsourcing for ground truth collection and machine learning applications  
Applications of computational pathology in the clinic
