

CALL FOR PAPERS

ICEGRSM 2020
Mar 19-20, 2020
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEGRSM 2020 : International Conference on Engineering Geology, Rock and Soil Mechanics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Engineering Geology, Rock and Soil Mechanics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Engineering geology	Geotechnical, material properties
Geospatial analysis and geologic mapping	Landslide and slope stability
Engineering mitigation of volcanic geohazards	Erosion, flooding, dewatering, and seismic investigations
Earthquake and structural engineering	Soil and rock mechanics
Spatial analysis and remote sensing	Geologic field mapping of geologic structures
Geological and geotechnical analysis, and design	Geologic formations
Structural planning	Soil units and hazards
Environmental impact analysis	Global positioning system
Civil or structural engineering design	Geophysical surveys
Value engineering	Deformation monitoring
Geological hazard assessments	Earthquake engineering
