

CALL FOR PAPERS

ICGCWN 2020
Mar 19-20, 2020
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGCWN 2020 : International Conference on Green Communication and Wireless Networking is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Green Communication and Wireless Networking. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Green wireless communication
Green telecommunication networks
Green communication and wireless networking
Energy-efficient wireless communication systems
Resource management in green wireless communication networks
Network cooperation in green wireless communication
Energy harvesting-based green wireless communication systems
Energy-efficiency in mobile and wireless access networks
Energy-efficiency in vehicular networks
Energy-efficiency in wireless sensor networks

Energy-efficient wireless network management
Cross-layer optimization of green wireless networks
Performance evaluation and modeling of green wireless networks
Standardization related to wireless green communications and networking
Green wireless network planning and optimization
Wireless networking for the smart grid
Wireless networking for the green home
Wireless networking for energy-efficient buildings
Wireless networking for energy-efficient industrial automation
