

CALL FOR PAPERS

ICMCHMT 2020
Mar 19-20, 2020
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMCHMT 2020 : International Conference on Mobile Communications and Heterogeneous Mobile Technologies is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mobile Communications and Heterogeneous Mobile Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Principles of mobile communication
Mobile communication networks
Mobile communication systems
Communications technologies
Next generation mobile network
Heterogeneous mobile technologies
Complex design
System requirements
Security
Applications
Wireless access
Propagation modeling
Modulated signals and their power spectra

Digital signaling on flat fading channels
Error control coding
Cross-layer architecture design
Cross-layer coordination method
Broadband wireless internet
Coordination planes
Evolution of mobile radio communications
Present day mobile communication
Fundamental techniques
Multipath wave propagation and fading
Free space radio wave propagation
The cellular engineering fundamentals
Modern wireless communication systems
