

# CALL FOR PAPERS

**ICSTSAM 2020**  
**Mar 19-20, 2020**  
**Dubai, UAE**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSTSAM 2020 : International Conference on Sustainable Transportation Systems, Analysis and Modeling is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainable Transportation Systems, Analysis and Modeling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Sustainable transportation  
Transportation engineering  
Principles and visions of sustainable transportation  
Advanced transportation engineering and inventions  
Sustainable transportation, common and current problems  
Sustainable transportation systems, policies, and technologies  
Sustainable transportation infrastructure  
Vehicle operations  
Sustainable transportation and maintenance  
Artificial transportation and sustainability

Transportation and social sustainability  
Carbon neutral fuel  
Electric and Green vehicles  
Plug-in hybrid  
Road traffic safety  
Sustainable transport  
Transportation demand management  
Sustainable freight and delivery systems  
Vehicle-free city planning  
Pedestrian and bicycle friendly design
