

# CALL FOR PAPERS

**ICWPEMC 2020**  
**Mar 19-20, 2020**  
**Dubai, UAE**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWPEMC 2020 : International Conference on Wildlife Populations, Estimation Methods and Conservation is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wildlife Populations, Estimation Methods and Conservation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wildlife populations  
Global wildlife populations  
Management of animal populations  
Wildlife population ecology  
Wildlife population assessment  
Wildlife population control techniques  
Estimating wildlife populations  
Estimation methods  
Sampling methods  
Models for management of wildlife populations  
Population density  
Hunting or trapping seasons  
The impact of disease on wildlife populations

Wildlife demography and analysis  
Food and energy demand  
Conservation of wildlife populations  
Wildlife population health specialty  
Wildlife population growth rates  
Demography and genetics  
Specific groups of wildlife  
Human dimensions  
Policy and economics  
Total counts  
Incomplete counts  
Indirect counts  
Mark-recapture methods
