

CALL FOR PAPERS

ICAMC 2020
Mar 19-20, 2020
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAMC 2020 : International Conference on Advances in Mechanical Chemistry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Mechanical Chemistry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mechanochemistry and mechanical chemistry

The mechanochemistry of organic molecules and soft organic molecules

The mechanochemistry of inorganic compounds and coordination-based materials

Sonication and macromolecular mechanochemistry

The mechanistic understanding, catalysis and scaling up of mechanochemistry

Mechanochemical reactions and processing in solid state science and technology

Mechanical alloying and amorphization

Mechanisms of mechanochemical reactions, Thermodynamics and modeling

Structural characterization of reaction intermediates and products

Functional properties of mechanochemically prepared materials

Application and process engineering of mechanochemistry
