

CALL FOR PAPERS

ICAMF 2020
Mar 19-20, 2020
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAMF 2020 : International Conference on Applications of Mathematical Forestry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Applications of Mathematical Forestry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mathematical forestry
Mathematical statistics applied to forest sciences
Forest resource management and mathematical modeling
Mathematical models in forestry research
Computational techniques applied to forest management
Software developments, and simulations for forestry
Sampling and natural resource inventories
GIS and remote sensing

Growth and yield and quantitative silviculture
Hydrology and water resources
Programming and software development
Forest measurements, quantitative methods and management
Natural resource econometrics
Operations research and decision support systems
Decision support tools for sustainable forest management
Biomass supply and sustainability analysis
