

CALL FOR PAPERS

ICFTBG 2020
Mar 19-20, 2020
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFTBG 2020 : International Conference on Forest Tree Breeding and Genetics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Forest Tree Breeding and Genetics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Tree breeding
Forestry tree breeding
Optimization
Tree improvement
Climate change
Techniques in forest tree breeding
Application of genetic
Reproductive biology
Economics principles to the genetic improvement
Management of forest trees
Selective breeding of livestock
Selection of superior phenotypes

Natural or planted forest
Genetic trials
Field design
Advanced technologies in tree breeding
Breeding population structure
Genetic diversity and risk in forestry
Cuttings or in-vitro methods
Improvement and adaptation to particular conditions
Pest- and disease-resistance
Wood properties
Fast development in plant genetics and genomics
Genetically modified tree
