

CALL FOR PAPERS

ICSEM 2020
Mar 19-20, 2020
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSEM 2020 : International Conference on Subsurface Exploration Methods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Subsurface Exploration Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Subsurface exploration
Subsurface investigations
Geophysical tests
Formation of soils and landforms
Field reconnaissance
Sampling techniques and tools
Boring methods
Sampling methods
The standard penetration test (SPT)
The cone penetration test (CPT)
Log of boring information (boring logs)
Groundwater measurements
Ground conductivity

Electrical resistivity traversing
Gravity methods
Geotechnical site characterization
Geotechnical and geophysical site characterization
Modern methods for subsurface site characterization
Investigation design
Soil strength
Groundwater monitoring
Data presentation
Field and laboratory testing
Sub-level structure feasibility
Seismic hazard evaluation
Laboratory investigation methods
