

# CALL FOR PAPERS

**ICUFRS 2020**  
**Mar 19-20, 2020**  
**Istanbul, Turkey**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICUFRS 2020 : International Conference on Urban Forest Resource and Statistics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Urban Forest Resource and Statistics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |   |   |
|---|---|
| Urban forestry  | Planning and design                     |
| Care and management of tree populations in urban settings | Ordinances                              |
| Improving the urban environment                           | Community involvement                   |
| Urban forest statistics                                   | Arboriculture                           |
| Urban forest effects, benefits and costs                  | Future directions                       |
| Local climate effects                                     | Monitoring of the urban forest resource |
| Effect on building energy use                             | Urban forest health                     |
| Air quality effects                                       | Tree and forest preservation            |
| Hydrologic effects  | Urban infrastructure                    |
| Effects on noise  | Functions and values                    |
| Biological effects  | Practice                                |
| Social effects  | Tree planting                           |
| Urban forest management                                   |   |
