

CALL FOR PAPERS

ICANCS 2020
Mar 12-13, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICANCS 2020 : International Conference on Artificial and Natural Complex Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Artificial and Natural Complex Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- | | |
|------------------------------------|------------------------------------|
| Artificial Intelligence | Biological Modelling |
| Intelligent Agents | Social Modelling |
| Multiagent Systems | Bio-inspired Methods |
| Self-organization Modelling | Complex Systems Methods |
| Evolutionary Models | Information Technology Modelling |
| Complex Modelling Methodology | Cognition Modelling |
| Complex Modelling for Decision | Network Modelling |
| Support Systems | Model-based Verification and |
| Control and Synchronization of | Validation |
| Chaotic Dynamical Systems | Parallel and Distributed Computing |
| Dynamics Control Through Invariant | Automata and Formal Language |
| Properties | Informatics in Control |
| Complex Systems | Fuzzy Systems |
| Intelligent Systems | Medical Informatics |
| Medical Applications | |
| Biomedical Computing | |
