

CALL FOR PAPERS

ICMCUN 2020
Mar 12-13, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMCUN 2020 : International Conference on Mobile Computing and Ubiquitous Networking is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mobile Computing and Ubiquitous Networking. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mobile computing, services and applications
Home and building energy management system
Mobile computing and services for urban and public transport systems
Ubiquitous networking
Mobile and pervasive healthcare
Context-aware computing and services
Mobile/wearable computing systems and services
Energy-efficient and green computing
All wireless communication technologies such as WBAN, WPAN, WLAN and WWAN
Ad-hoc and sensor networks

Mobile Communication architectures
Positioning and tracking technologies
Data management for mobile computing
Sensors and RFIDs in mobile and ubiquitous computing
Software defined radio and white space communication
Participatory sensing
Smart devices and intelligent environments
Trust, security and privacy issues in mobile and ubiquitous computing and networking
Social networking and computing
Mobile P2P and gaming
