

CALL FOR PAPERS

ICMMP 2020
Mar 12-13, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMMP 2020 : International Conference on Memory Models and Problems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Memory Models and Problems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Memory models	Sensory register as a separate store
Atkinson-Shiffrin memory model	Division and nature of working memory
Baddeley's model of working memory	Rehearsal as the sole transfer mechanism
Memory-prediction model	Division of long-term memory
Sensory register	Search of associative memory (SAM)
Iconic memory and echoic memory	Short-term store
Short-term store	Long-term store
Duration and capacity of short-term store	Retrieval from long-term store
Long-term store	Recency effects
Transfer from STS	Problems for the SAM model
Capacity and duration of long-term store	Components of working memory
Evidence for distinct stores	Central executive
Criticism	Phonological loop
