

CALL FOR PAPERS

ICSMMS 2020
Mar 12-13, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMMS 2020 : International Conference on Superconducting Materials and Materials Science is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Superconducting Materials and Materials Science. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Superconducting materials

Novel superconducting materials and applications

Superconductivity, superconductors and superconducting materials

Engineering applications and processing challenges

Novel applications and manufacturing techniques

Chemistry of superconducting materials

Superconductor principles

High-temperature superconductors

Mechanical properties of superconducting materials

Iron-based superconductors

Organic superconductors

Carbon-based materials

Chemical doping effects on superconductivity

New materials

Physical and chemical properties of new superconducting materials

Material synthesis

Heterostructures

Thin films
