

CALL FOR PAPERS

ICTIR 2020
Mar 12-13, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTIR 2020 : International Conference on Threat Intelligence and Reengineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Threat Intelligence and Reengineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Reverse engineering and re-engineering
Reverse engineering methods, analyses and algorithms
Threat Intelligence
Automated reasoning techniques
Computer supported cooperative work
Behavioural and attribution analysis of malware
Configuration management
Data mining
Domain modeling and meta-modeling
Software engineering
Human-computer interaction
Malware incident response
Mobile app development

Automated defect repair
Analysis and measurements of real malware incidents
Maintenance and evolution
Model-driven development
Program synthesis and transformations
Program comprehension
Recommender systems for software engineering
Requirements engineering
Specification languages
Software architecture and design
Software visualization
Knowledge acquisition and management
Cloud computing
