

# CALL FOR PAPERS

**ICWWWDM 2020**  
**Mar 12-13, 2020**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWWWDM 2020 : International Conference on World Wide Web and Data Mining is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of World Wide Web and Data Mining. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Intelligent World Wide Web  
Distributed architectures for structured data on the Web  
Emergent semantics of structured data repositories  
Ontologies and representation languages  
Search and retrieval based on document understanding  
Web data mining, ontology learning  
Applications of semantic web formats for learning and science  
Social network analysis and graph algorithms for the web  
Web of things, ubiquitous and mobile computing

Web mining and content analysis  
User modeling, behavior and experience  
Intelligent and autonomous systems on the web  
User modeling, personalization, and experience  
Social network analysis and graph algorithms  
Intelligent systems and infrastructure  
Economics, monetization, and online markets  
Crowdsourcing and human computation  
Future of the web
