

CALL FOR PAPERS

ICGF 2020
Mar 26-27, 2020
Madrid, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGF 2020 : International Conference on Ground Freezing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ground Freezing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ground freezing
Artificial ground freezing in
geotechnical engineering
Performance and analysis of
artificial ground freezing
Thermo-hydraulic modeling of
artificial ground freezing
Ground freezing technique for soil
stabilization
Ground freezing in tunnel
construction

Modeling and optimization of ground
freezing in tunneling
Traditional tunnel excavation using
ground freezing technology
Ground freezing for cross passage
construction
Application of ground freezing for
underground construction
Ground freezing and climate change
Economics of ground freezing
