

# CALL FOR PAPERS

**ICGM 2020**  
**Mar 26-27, 2020**  
**Madrid, Spain**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGM 2020 : International Conference on Genetic Modification is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Genetic Modification. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Genetic modification  
Molecular docking and computational  
evolutionary biology  
Applications of genomics  
Genome analysis  
Genetic engineering techniques  
Machine learning in molecular  
systems biology  
Current challenges in modeling  
cellular metabolism

Plant biotechnology, plant genetics  
and its developments  
Molecular genetics and  
microbiology  
Plant and human genetics  
Genetic and molecular basis of crop  
improvement  
Molecular markers  
Transgenics
