

CALL FOR PAPERS

ICGM 2020
Mar 26-27, 2020
Madrid, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGM 2020 : International Conference on Genetic Modification is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Genetic Modification. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Genetic modification
Molecular docking and computational
evolutionary biology
Applications of genomics
Genome analysis
Genetic engineering techniques
Machine learning in molecular
systems biology
Current challenges in modeling
cellular metabolism

Plant biotechnology, plant genetics
and its developments
Molecular genetics and
microbiology
Plant and human genetics
Genetic and molecular basis of crop
improvement
Molecular markers
Transgenics
