

CALL FOR PAPERS

ICMFR 2020
Mar 26-27, 2020
Madrid, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMFR 2020 : International Conference on Molecular Nutrition and Food Research is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Molecular Nutrition and Food Research. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Molecular Nutrition and Food
Research

Bioactivity and Safety

Chemistry, Isolation and analysis
of bioactive food ingredients while
considering environmental aspects

Food, Nutrition and Growth

Immunology, Understanding the
interactions of food and the immune
system

Infancy, Childhood and Adolescence

Microbiology - Food spoilage, food
pathogens, chemical and physical
approaches of fermented foods and
novel microbial processes

Molecular Nutrition and Food
Research

Neonatal and Prematurity

Nutrigenomics and metabolomics

Nutritional and medical effects of
food constituents including
integrated risk/benefit
evaluations

Nutritional biochemistry

Obesity and weight management
