

CALL FOR PAPERS

ICOIE 2020
Mar 26-27, 2020
Madrid, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICOIE 2020 : International Conference on Optimization in Industrial Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Optimization in Industrial Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Production planning and control
Supply chain management and logistics
Facility Location and plant Layout
Inventory control
Project scheduling
Reliability and system safety
Application of soft computing in industrial engineering
Statistical methods in industrial engineering
Simulation
Manufacturing and process planning
Decision theory

Production scheduling and sequencing
Financial engineering
Maintenance management
Routing and transportation planning
Stochastic processes
Data mining
Quality engineering and management
Queuing theory
Pricing and revenue management
Fuzzy sets theory
