

# CALL FOR PAPERS

**ICPCS 2020**  
**Mar 26-27, 2020**  
**Madrid, Spain**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPCS 2020 : International Conference on Process Control Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Process Control Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Process control
- Control theory
- Components of control loops
- Controller algorithms and tuning
- Process control loops
- Multi-variable and advanced control loops
- Linear and non-linear control system design
- Modelling, simulation, and identification of processes
- Process measurements and devices

- Process optimization
- Robust and adaptive control
- Control education
- Intelligent control systems
- Industrial automation
- Applications and case studies
- Model predictive control
- Algorithms and computing for control
- MATLAB computing and toolboxes
