

CALL FOR PAPERS

ICPCS 2020
Mar 26-27, 2020
Madrid, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPCS 2020 : International Conference on Process Control Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Process Control Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Process control
Control theory
Components of control loops
Controller algorithms and tuning
Process control loops
Multi-variable and advanced control loops
Linear and non-linear control system design
Modelling, simulation, and identification of processes
Process measurements and devices

Process optimization
Robust and adaptive control
Control education
Intelligent control systems
Industrial automation
Applications and case studies
Model predictive control
Algorithms and computing for control
MATLAB computing and toolboxes
