

# CALL FOR PAPERS

**ICRCE 2020**  
**Mar 26-27, 2020**  
**Madrid, Spain**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRCE 2020 : International Conference on Resource Constrained Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Resource Constrained Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Practices and processes,  
conceptualizations and principles  
of resource-constrained  
engineering  
Engineering and product development  
in the emerging markets and  
least-developed countries  
Product development and engineering  
practices in small and medium-sized  
firms in industries with low  
R&D-intensity

New Technologies in  
resource-constrained product  
development and engineering  
Innovations in enterprises with a  
large role of the public sector  
such as space, housing and  
healthcare
