

CALL FOR PAPERS

ICSTO 2020
Mar 26-27, 2020
Madrid, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSTO 2020 : International Conference on Semantic Technologies and Ontologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Semantic Technologies and Ontologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Semantic technology
Ontology and reasoning
Knowledge graph
Linked data
Big data and semantics, exchange and integration
Data streams and the internet of things
Machine learning and information extraction on the semantic web

Semantic web services and processes
Trust, privacy, and security on the semantic web
Social semantic web
Natural language processing and semantics
Semantic multimedia
Novel applications of semantic technologies
