

CALL FOR PAPERS

ICMCS 2020
Mar 12-13, 2020
Miami, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMCS 2020 : International Conference on Microbial Cellular Structures is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Microbial Cellular Structures. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Microbial screening and physiology
Microbial cellular structures
Metabolism diversity in microbes
Microbes and environments
Microbial metabolism
Microbial genetics - problems
Advanced microbial genetics
Microbial cell physiology
techniques
Microbial identification
techniques
Microbial evolution, phylogeny and
diversity

Microbial growth
Industrial microbiology
Food and industrial beneficial
microbes
Microbe, disease and vaccination
Microbial ecology
Microbial diseases
Different types of cell wall
inhibition by antibiotics
Microbial cell walls biogenesis
Microbial cell walls functions
Types of bacterial cell walls
structures
