

CALL FOR PAPERS

ICACE 2020
Mar 26-27, 2020
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACE 2020 : International Conference on Advances in Computational Economics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Computational Economics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computational economics
Computational methods in
econometrics
Computational techniques applied to
economic problems and policies
Control and game theory
General equilibrium models
Economic dynamics
Software development and
implementation
Bayesian and non-parametric
approaches

Markov processes and Monte Carlo
simulation
Agent based methods
Machine learning and evolutionary
algorithms
Network modeling; computational
aspects of dynamic systems
Optimization, optimization methods
and optimal control
Equilibrium modeling; hardware and
software developments
Modeling languages, interfaces, and
symbolic processing
Distributed and parallel processing
