

CALL FOR PAPERS

ICECS 2020
Mar 26-27, 2020
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICECS 2020 : International Conference on Embedded and Control Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Embedded and Control Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Embedded control systems
Embedded control systems design
Analysis, design, and optimization
of embedded control systems
Rapid prototyping for embedded
control systems
Real-time computer systems
Hybrid and embedded control
systems
High-quality embedded control
systems
The application of C-programming on
a microprocessor

Digital I/O and serial
communication
Quadrature decoding for wheel
position sensing
Queued analog-to-digital conversion
to interface with the analog world
Pulse width modulation
Timer interrupts to create sampling
time intervals
System dynamics and virtual worlds
with haptic feedback
Rapid prototyping
