

CALL FOR PAPERS

ICNGEMC 2020
Mar 26-27, 2020
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNGEMC 2020 : International Conference on Next Generation Electrode Material and Coatings is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Next Generation Electrode Material and Coatings. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electrode materials for energy storage and conversion
Li-ion and post Li-ion batteries (Na-ion, Mg-ion, hybrids, etc.)
Carbon nanomaterials
Synthesis of organic/inorganic materials
Thin films (CVD, PVD, electro-less, etc.)
Electrolytes formulation (solid state, additives, etc.)
Electrodes from biomass

Electrode/electrolyte interfaces
Supercapacitors
Redox-flow batteries, Li-S, Na-S
Solar cells
Fuel cells
Catalysts
