

CALL FOR PAPERS

ICBDWN 2020
Mar 19-20, 2020
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBDWN 2020 : International Conference on Big Data and Wireless Networks is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Big Data and Wireless Networks. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Big data and wireless networks
Wireless network architecture, design, operation, management, algorithms, and analysis for big data
Wireless resource optimization for big data
Wireless network QoS and QoE provisioning for big data
Wireless network virtualization for big data
Wireless mobile cloud computing for big data
Wireless software defined networking for big data
Wireless network security and privacy for big data
Green wireless communications and networking for big data
Wireless smart grid networks for big data

Big data for wireless network architecture, design, operation, management, algorithm, and analysis
Big data for wireless resource optimization
Big data for wireless network QoS and QoE
Big data for wireless network virtualization
Big data for wireless mobile cloud computing
Big data for wireless software defined networking
Big data for wireless network security and privacy
Big data for green wireless communications and networking
Big data for wireless smart grid networks
