

# CALL FOR PAPERS

**ICGSED 2020**  
**Mar 19-20, 2020**  
**Prague, Czechia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGSED 2020 : International Conference on Global Software Engineering and Development is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Global Software Engineering and Development. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Global software development  
Global software engineering and technology  
Cloud computing and crowdsourcing  
Communication, coordination, and control  
Design thinking and global product design  
Industrial offshoring and outsourcing experiences  
Industry case studies of all topics in this list  
Lean and agile development  
Managing and working with suppliers and contractors  
Methods and processes  
Mining software repositories and software analytics

Open source software communities  
Security and privacy  
Social and human aspects of software development  
Social network analysis  
Software architecture  
Software business model innovation  
Software evolution and maintenance  
Software project management  
Software testing  
Strategic issues in distributed development  
Tools and infrastructure support
