

CALL FOR PAPERS

ICMTVD 2020
Mar 19-20, 2020
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMTVD 2020 : International Conference on Modern Technologies in Vaccine Development is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Modern Technologies in Vaccine Development. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Human vaccines infectious and non-infectious

Vaccines emerging and re-emerging diseases: flu, ebola, HIV and malaria

Modern technologies in vaccine discovery and development

Recent trends in attenuated vaccines

Developing next-gen conjugate vaccines

Veterinary vaccines

Virus-like particle vaccines :applications

Advancements in vaccine development

Vaccines safety and schedule

Respiratory disease vaccines

Vaccines for child and pregnant women

Adjuvants for human/ animal vaccines—current status, problems and future prospects

Toxoid vaccines and its importance

Vaccines under research and development, major diseases

Delivery technologies

Immunology/animal models

Dna vaccines

Vaccine and retro viral diseases

Vaccines business and market analysis

Age-specific immune response to vaccination

Production, manufacturing and safety

Vaccinations and immunization practices

Mucosal vaccines
