

# CALL FOR PAPERS

**ICSDCE 2020**  
**Mar 19-20, 2020**  
**Prague, Czechia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSDCE 2020 : International Conference on Sustainable Design and Construction Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainable Design and Construction Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |  |  |
|--|--|
| Accessibility  | Design for deconstruction  |
| Actions and policies to implement sustainable construction     | Design for flexibility   |
| Adapting to Climate Change                                     | Design for minimizing and using construction and demolition waste              |
| Advanced Monitoring Systems                                    | Design for Security and Sustainability   |
| Architectural Engineering                                      | Design for service-life  |
| Biodiversity   | Design quality   |
| Biomimicry and design with nature                              | Designing Inclusive Environments   |
| Building sustainability assessment tools                       | Designing the sustainable city of tomorrow and Urban Sustainability            |
| Conservation (buildings and nature)                            | Develop energy efficient buildings at design stage to secure long-term savings |
| Conserve energy, water and other resources                     | Eco-materials and technologies   |
| Construction Engineering                                       | End-user and community involvement   |
| Design and technologies for energy efficiency and conservation | Energy and Environment   |
| Design for climate change                                      |  |
